

Software Engineer

Full-Stack Developer with a backend focus, adept in Node.js (Express, NestJS) and Golang, and skilled in React.js for intuitive UIs. I'm passionate about architecting scalable, real-time systems and integrating advanced AI solutions (RAG, autonomous bots) to enhance security and verification. With a robust background in SQL and NoSQL databases, I'm driven to contribute to privacy-first digital identity platforms, valuing clean architecture, continuous learning, and impactful development.

Work Experience

Backend Engineer

Cogent Softech | Beirut, Lebanon | May 2022 – Present

- Engineered and optimized scalable backend services for enterprise-level applications using **PHP, NestJS, Node.js, Golang, and Medusa.js**, resulting in a 25% improvement in server response time.
- Designed, developed, and maintained efficient and secure **RESTful APIs** and **microservices architecture**, enhancing system modularity and scalability for four major client projects.
- Led the successful containerization of five critical applications (React.js, Next.js, Nest.js, PHP) utilizing **Docker**, which streamlined development and deployment processes.
- Architected and administered relational and NoSQL database schemas (MySQL, PostgreSQL, MongoDB) and complete system infrastructures; specialized in e-commerce solutions by implementing and customizing headless platforms like Medusa.js.

Backend Engineer

Ordoro | Jeddah, Saudi Arabia (Remote) | May 2022 – Jan 2024

- Developed a scalable B2B eCommerce platform from the ground up using **Medusa.js**, architecting a **multitenant architecture** to support seamless operations for a diverse client base.
- Optimized complex delivery logistics by implementing **Google's Optimization AI** to solve the Vehicle Routing Problem (VRP), reducing delivery costs by 15%.
- Engineered and integrated a full-featured Point of Sale (POS) system for retailers, creating a unified ecosystem with the core B2B platform for seamless inventory and sales management

Backend Developer

YAWAR – May 2023 – Aug 2024

- Migrated a large-scale JavaScript application to TypeScript for improved maintainability and type safety. Refactored legacy code into modular components, boosting performance by 25%, and implemented dependency injection with TypeORM for better database management.

PROKODERS – Remote, United Arab Emirates

Backend Developer December 2021 – January 2023

- Designed, developed, and maintained scalable **ERP systems, Learning Management Systems (LMS)**, and custom web applications using **Laravel** and **PHP**.

Core Proficiencies & Skills

Programming Languages:

PHP, Node.js, Golang, JavaScript, TypeScript, Python

Backend Frameworks & Libraries:

Laravel, NestJS, Express.js, Gin, Echo, Django

Frontend & UI Development:

React.js, HTML, CSS, TypeScript (UI integration with backend systems)

Databases & Data Management:

SQL and NoSQL — MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Meilisearch, RabbitMQ

Cloud Platforms & DevOps Tools:

Amazon Web Services (EC2, ECR, Lambda, RDS, Cognito), Docker, GitLab CI/CD, Nginx, Linux (Ubuntu/CentOS)

Software Development Practices:

REST API, GraphQL, Microservices Architecture, MVC Pattern, SOLID Principles, Design Patterns, Test-Driven Development (Jest), Continuous Integration & Deployment (CI/CD), System Architecture & Design

AI Tools & Integrations:

Prompt Engineering, RAG (Retrieval-Augmented Generation), Autonomous Bots, CursorIDE, AI Workflow Integration, Claude

Web Scraping & Automation:

BeautifulSoup, Custom Data Crawlers, Scripted Extraction

E-commerce & Payment Gateways:

Medusa.js, Stripe, PayPal, FedEx, Shippo, ZATCA-compliant e-invoicing, BNPL (Buy Now, Pay Later),

- Introduced and implemented **modular architecture** using **.NET Core**, enhancing code reusability and maintainability.
- Achieved a **15% reduction in code maintenance time**, accelerating feature delivery and reducing deployment cycles.

Flexsol (remote)

Fullstack Developer (Laravel / HTML / CSS / JS) (Jan 2021 – Dec 2021)

- Designed and developed a **dashboard and API** for a **university library mobile app**, enabling seamless access to resources.
- Built and enhanced features for selling video courses and lectures, including interactive subject-based test modules designed to improve student exam readiness and engagement.

PerfectMoney, Tasdid, Switch, ZainCash

Real-Time Communication & Media:

WebSockets, Socket.IO, Firebase Realtime DB, LiveKit, FreeSWITCH, SIP Integration

Third-Party & IoT Integrations:

Social Media APIs (Facebook, Instagram, Twitter), Calendar APIs (Google Calendar, Office 365, Microsoft Exchange), IoT Devices (Airthings, Webex, Cisco Devices, Salto Smart Lockers)

Open Source Contributions:

Flowtify [GitHub](#) , [NPM](#). – A flexible and robust TypeScript library for defining and executing workflows.

- Designed and developed core functionality, including sequential and parallel execution, compensation handling, and support for dependency injection.

Medusa FCM Notification [GitHub](#) ,[NPM](#) – Firebase Cloud Messaging (FCM) provider for Medusa.js.

- Developed a custom Medusa.js notification provider to send real-time push notifications using

Medusa Documents – Arabic Language Support Plugin [GitHub](#),[NPM](#)

- Developed a custom Medusa.js plugin to generate PDF documents such as invoices and packing slips with full Arabic language support. Enhanced RTL (right-to-left) layout handling and font rendering for accurate multilingual output.

Medusa AI Shopping Assistant [GitHub](#)

- A conversational commerce plugin for **Medusa.js** that leverages AI to assist users in shopping, answering questions, and providing recommendations.

Medusa Abandoned Cart Recovery [GitHub](#)

- A plugin for **Medusa.js** that helps recover abandoned shopping carts through automated customer engagement.

Languages

- English *Full Working Professioncy*
- German *A1*
- Arabic *Native*

Education

Tishreen University – Syria

Bachelor of Software Engineering *Nov 2016 – Nov 2021*

- Graduated Top 4, GPA: 85.23% (Excellent)

HONORS & AWARDS

Albasel Certificate - Tishreen University

- Achieved 89.5% in recognition of academic excellence.
